Low-Charge Ammonia in Australia

Australia: *Accelerate America* magazine recently focused on the increased use of low-charge ammonia technology in Australia. Scantec Refrigeration Technologies, a long-time customer of Colmac Coil, has recently installed low-charge projects in Melbourne and Brisbane. “The only feedback from the end user we’ve had is happiness,” said Stefan Jensen, managing director at Scantec. With several new projects on the horizon, 2017 will most likely see an expansion of ammonia technology in Australia.

The entire article from *Accelerate America* is available for viewing [here](#) (pg 22).

About Colmac Coil Manufacturing, Inc.

Since 1971 Colmac Coil has provided customers worldwide with innovative heat exchangers and heat transfer solutions for industrial refrigeration, HVAC, power generation, and gas compression applications. The company builds heating and cooling coils, refrigeration air coolers and blast freezers, air-cooled fluid coolers and condensers, and heat pipes for heat recovery. State-of-the-art selection software accurately calculates heat exchanger performance for a wide range of working fluids, materials, and operating conditions. World-class manufacturing facilities in both Washington State and in Illinois provide customers with fast delivery times and outstanding after sales support. www.colmaccoil.com
