

## The Sabroe UniSAB 4 Controller Your new platform of the future

The cost of downtime is one of the biggest threats companies face today. The UniSAB 4 from the Sabroe product range is tailor-made to solve this issue by providing reliable uptime and energy efficiency.

### 125 years of expert knowledge

UniSAB 4 is the result of 125 years of expert knowledge: a new, powerful hardware with a colour touchscreen and an intuitive, easy-to-use interface display for improved speed and control, ensuring you the best possible performance. And the less energy you use, the more sustainable and cost effective you can be.

### UniSAB 4: next generation of the well-known UniSAB III

Outside, the difference is clear with an intuitive, easy-to-use interface display for greater speed and control. Inside, the software has a completely new design, optimised to supply greater efficiency and connectivity options such as IoT and more on-board inputs and outputs.

### Easy upgrade and retrofit

With an easy upgrade from UniSAB III, plug-and-play technology and an identical footprint for easy retrofit, the UniSAB 4 easily integrates into most control systems including the UniSAB III.

### Peace of mind with full digital information

Integrated with Johnson Controls OpenBlue, the UniSAB 4 offers security for fully informed decisions, with new connectivity through digital services.

SabroeControl

## UniSAB 4. More capable. More sustainable. More cost effective.

Industries our products support:

### Your benefits using the UniSAB 4:

- Powerful hardware with more inputs and outputs
- Same footprint and cable-wire plug configuration as with UniSAB III
- 10.1" colour touchscreen with Chrome embedded web browser
- User screens as responsive web pages
- Secure internet connection
- Flexible and user configurable Multisab++ sequencing system
- Industrial communication protocols
- UniSAB 4 is fully integrated with Johnson Controls OpenBlue services
- Also available for retrofit
